and Byrd streets. The firemen required to respond to an alarm from that box were exceedingly 1st. prompt in reaching Tenth and Canal streets, where they were stationed in order to get a supply of water from the basin. But while they were waiting for steam the fire made considerable headway, and by the time the steamers got to work the shed which adjoins the mill on the north, and under which the engine which works the machinery for the mill was stationed, was almost entirely consumed. The flames were now drawn through the windows into the mill proper, and attacking the light timbers, sumac, and bark on the second floor, soon set the whole western end of the building inside on fire. It spread from floor to floor with great rapidity, and it was not more than half an bour before the entire building was hopelessly in firmes. A second alarm was about this time turned in at Station 14, and the Brook-avenue steamer (D) and the Church Hill Hose Company (F) turned out. The fire appears to have originated in the engine-room, although the engineer states that he put out the fire in the engine before
